

SAFETYVIEW® PRO ADVANCED PLAYBACK SOFTWARE

SafetyView® PRO dynamic video viewing software provides fleet administrators ultimate playback control. Quickly and easily search, view, export, and manage digital video assets. See speed, GPS, accelerometer and other metadata graphically displayed for easy analysis.

Advanced Video Search

Quickly navigate and find critical evidence efficiently with SafetyView PRO's intuitive Calendar Search. Recorded video can be searched simply by date and time, with events clearly marked in red for immediate footage review. Events may also be scheduled for deletion and are eventually overwritten the next time new video is recorded.

Complete Playback Control

A customizable display area enables video channels, including the map, speed and acceleration graphs, to be moved within the playback screen. Select from a variety of configurations in which to display the layout of channels. Rename channels, zoom-in, rotate and flip video, blur faces, export in multiple formats, and much more with SafetyView PRO innovative software.

Vehicle Mapping Data

Document chain of events and know exactly what happened the next time an incident occurs. View the accurate location of any vehicle and observe corresponding metadata such as speed, route history, vehicle signals, hard braking and more, all synchronized with video and readily displayed for easy investigation of events.

Features

- Customizable display area
- Export videos effortlessly in a variety of formats
- Intuitive Calendar Search
- Metadata graphically displayed and synchronized with video
